

Laborastories - Storytelling at Mall Anders

Young scientists from Berlin's Clusters of Excellence

Berlin's Clusters of Excellence

Start Time: Friday, June 10, 2022

End Time: Friday, June 10, 2022

Mall Anders in WILMA Shopping-Center,
Wilmerdorfer Straße 46, 10627 Berlin

Have you always wanted to know why young people go into research? Then here you have the opportunity to meet scientists from the Clusters of Excellence of the Berlin University Alliance. The researchers will tell you their story in a short lecture - personal, vivid and exciting. Afterwards, there will be time for personal talks.

For UniSysCat, Sabine Oldemeyer will give an insight into her work as a biophysicist. Sabine is currently doing a PostDoc in the group of [Prof. Joachim Heberle](#) at Freie Universität Berlin. Her scientific focus is on light-induced processes in retinal proteins and cryptochromes.

Come to Mall Anders and meet scientists from research fields as diverse as mathematics and literature, as brain research and material sciences, chemistry and democracy research. Meet the scientists and be carried away by their stories!

About the visit at "Mall Anders".

The venue is the premises of [Mall Anders](#), a pop-up science lab located in the ground floor of the "Wilma Shoppen" center formerly known as "Wilmerdorfer Arcaden".
