

## Electrochemistry Conference 2022 in Berlin

Start Time: Wednesday, September 21, 2022

End Time:

Electrochemistry is a successful conference series that takes place every two years. The conference is jointly organized by GDCh Division Elektrochemie, GDCh Arbeitskreis Elektrochemische Analysenmethoden, DBG, DECHEMA, AGEF, GfKORR and DGO.

This year, after a corona gap, the [Electrochemistry 2022](#) will take place from 27 to 30 September at Freie Universität Berlin and is organized by the three UniSysCat PIs [Prof. Dr. Peter Strasser](#), [Prof. Dr. Beatriz Roldán Cuenya](#) and [Prof. Dr. Holger Dau](#).

Electrochemistry – At the Interface between Chemistry and Physics. In this spirit, the organizing committee and societies invite electrochemists, scientists from other disciplines, who are interested in electrochemistry, and students to meet in Berlin. Colleagues from industry and academia, from Germany and abroad are cordially invited to participate in the conference and to enrich its program by their scientific contribution. [Registration is still possible.](#)

Electrochemical science and development generate the technology for many applications, e.g. energy storage, sensors, synthesis of chemicals, modification of surfaces and corrosion protection. Electromobility and biotechnology triggered a revival of electrochemical techniques recently. The conference program covers electrochemical topics from fundamental science to industrial application.

### Venue

Henry-Ford-Bau der FU Berlin  
Garystraße 35  
14195 Berlin
