

Thematic Conference „Plastic in the 21st Century: New Materials and Processes“

Start Time: Friday, June 30, 2023 09:00 am

End Time: Friday, June 30, 2023 05:00 pm

EINS

Ernst-Reuter-Platz 1, 10587 Berlin

The [Technology Transfer Department](#) of TU Berlin is hosting, in cooperation with the [Chemical Invention Factory](#), the thematic conference „Plastic in the 21st Century: New Materials and Processes“.

Through this format, members of the industry will outline field challenges in short presentations, researchers will present the current state of the art in scientific research and startups will introduce their problem-solving approaches. At this occasion there will be three aspects in focus:

- Material Concepts and Recycling
- Chemical Recycling
- Synthesis & Feedstock

The keynote speech will be held by Prof. Dr. John Warner, pioneer of the 12 Principles of Green Chemistry, leading to a networking session about various plastic uses. For further information, access: [Programme and Registration](#). You can register until June 25, 2023. Participation is free of charge, but spots are limited.
