The Young Chemists' Forum [JCF](#) (JungChemikerForum of the Gesellschaft Deutscher Chemiker [GDCh](#)) cordially invites all young chemists and everybody working in chemistry-related fields to the 10th Berlin Chemistry in Practice Symposium (BCPS) on October 06, 2023 at TU Berlin!

The BCPS is an event by young people for young people, where you can present your work and learn about different career options in a modern, innovative, and diverse environment.

Highlights:

- We are very pleased to announce [Prof. John C. Warner](#) as keynote speaker. The world-

renowned pioneer and father of green chemistry will deliver an inspiring keynote address showing how the path to chemistry transformation is possible.

- Current research by and for young scientists
- Industry contacts
- A large diverse network of the leaders of the future: YOU

Advantages:

- Presentations and posters from all career levels: bachelor students to PhD students
- Regional and affordable
- Supportive environment of young people with the same interests

Under the theme **"Shaping the future of chemistry together"**, let's celebrate the 10th anniversary of the Berlin Chemistry in Practice Symposium with exciting talks, inspiring discussions, and delicious snacks!
