Global Women's Breakfast @ UniSysCat

Start Time: Wednesday, February 28, 2024

End Time:

A group of UniSysCat scientists met on Tuesday, 27th of February, for a breakfast. The Global Women's Breakfast is an annual worldwide event that was initiated by the IUPAC (International Union of Pure and Applied Chemistry). Under this year's motto "Catalyzing Diversity in Science", the researchers discussed where they see opportunities for improvement regarding diversity and discrimination, in UniSysCat and beyond. Perspectives from PhD students, Professors, PIs, and people working in the UniSys office were heard and many new ideas were brainstormed.
